APPLICANT : SANYO ELECTRIC CO LTD;

INVENTOR : NAMATAME TATSUO;

INT.CL. : A61L 9/015

TITLE : AIR QUALITY ACTIVATOR

ABSTRACT : PROBLEM TO BE SOLVED: To provide an air quality activator which enables not only supplying of oxygen enriched air into a room but also direct suction thereof by a mouth and a nose.

SOLUTION: Polluted air in a room is sucked through a suction port 17 and an air cleaning filter 5 by a circulation fan 17 and the air sucked is purified to be blown out into the room at a blowoff port 21. At this point, the oxygen enriched air generated by a concentrated oxygen generator 9 is blown out at the blowoff port 21 through a flexible tube 35 and an oxygen supply port 37 both housed in a housing section 23. Moreover, the oxygen supply port 37 concurrently serves as nose pad for suction. This oxygen supply port is taken out of the housing section 23 to be put on a mouth and a nose thereby enabling directly sucking of the oxygen enriched air of the concentrated air generator 9.
